

MUHAMMAD BILAL

Senior Frontend Engineer | React • Next.js • TypeScript • AI-Integrated UIs

Lahore, Pakistan • +92 314 1401358 • bilal.kalri@gmail.com • LinkedIn • muhammadbilal.org

PROFESSIONAL SUMMARY

Senior Frontend Engineer with **5+ years of experience** building scalable, high-performance, accessible web applications and SaaS platforms with **React, Next.js, and TypeScript**. Proven delivery of complex, real-world frontends: a **multi-channel e-commerce SaaS with 6+ marketplace integrations**, an **AI voice-agent platform**, and an enterprise workforce & operations suite. Deep expertise in **state management, component architecture, responsive UI, performance optimization**, and integrating **REST and AI/LLM APIs** into polished, production-grade interfaces. Strong collaborator in Agile/Scrum teams, comfortable owning the full frontend lifecycle from design handoff to deployment.

KEY HIGHLIGHTS

- **Shipped production SaaS at scale** — architected the frontend for a multi-channel e-commerce platform with 6+ marketplace integrations and 240+ reusable components.
- **AI-integrated interfaces** — built UIs around AI voice-agent and LLM/document-translation APIs, a growing differentiator in modern frontend work.
- **Complex, data-heavy UIs** — enterprise dashboards, real-time analytics, Stripe payments, and Firebase live notifications across multiple products.
- **Performance & accessibility focus** — code splitting, lazy loading, SSR/SSG, and WCAG-aligned, cross-browser interfaces.

CORE COMPETENCIES & TECHNICAL SKILLS

Core: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS

State & Data: Redux Toolkit, RTK Query, React Query / TanStack Query, Zustand, React Context, Custom Hooks, React Hook Form, Zod

UI & Styling: Tailwind CSS, Material UI, Radix UI, shadcn/ui, HeroUI, Responsive Design, WCAG Accessibility, Reusable Component Libraries

Performance: Code Splitting, Lazy Loading, Memoization, SSR/SSG, Cross-Browser Optimization, Core Web Vitals

Integrations: REST API Integration, AI/LLM API Integration, Stripe, Firebase (Firestore, Cloud Messaging), Recharts, Axios

Tooling & Practices: Git/GitHub, Vercel, Netlify, CI/CD, Agile/Scrum, Component Testing, Code Reviews, Figma-to-Code

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer | *Digimark2025 – Present • ~1 yr • Lahore, Pakistan*

- **Lead frontend development of production SaaS platforms** with Next.js, React, and TypeScript, including an AI voice-agent product and an enterprise operations suite for international clients.
- **Build AI-integrated, multi-panel interfaces**, wiring role-based authentication, call analytics, and LLM-powered workflows into cohesive, scalable, reusable component systems.
- **Deliver responsive, high-performance UIs** from design handoff to release, collaborating cross-functionally to meet client requirements and timelines.

Frontend Engineer | *Zweidevs2023 – 2025 • 22 mos • Lahore, Pakistan*

- **Built scalable frontends for SaaS products** with React.js, Next.js, and TypeScript, owning UI architecture, state management, and REST/AI API integration.
- **Engineered complex, data-heavy interfaces** — dashboards, marketplace integrations, and analytics views — using Redux Toolkit, RTK Query, and TanStack Query.
- **Drove performance improvements** via code splitting, lazy loading, and memoization, upholding accessibility, code quality, and Agile/Scrum practices.

Frontend Developer | *Disruptive Effects2021 – 2023 • 2 yrs • Lahore, Pakistan*

- **Built and shipped production web applications** with React.js, Next.js, and TypeScript, developing responsive, reusable component libraries and cross-browser-compatible, accessible interfaces.
- **Integrated REST APIs and optimized frontend performance** through state management, code splitting, and lazy loading, collaborating in Agile/Scrum teams to deliver features on schedule.

STRATEGIC PROJECT ENGAGEMENTS

Watchlytics — *Multi-Channel E-Commerce & Inventory Management SaaS · Zweidevs*

Frontend Solution: Architected the frontend for a production SaaS dashboard unifying inventory management (stock/SKU, trader sharing, aging reports), a market-intelligence module (price monitoring, movement analytics, AI-powered deal evaluation, priority alerts), sales & shipping, and financial reporting (P&L, expenses, invoicing) across 6+ marketplaces.

Architecture & Integrations: Next.js 15 (App Router) + React 19 + TypeScript with TanStack Query for server state and a centralized Axios client handling auth/CSRF; native connectors for eBay, Shopify, WooCommerce, Chrono24, Bezel, and Facebook; Stripe payments, Firebase real-time notifications (Firestore/Cloud Messaging), Recharts analytics, react-hook-form + Zod.

Stack: Next.js, React, TypeScript, Tailwind CSS, HeroUI, TanStack Query, Firebase, Stripe, Axios

Impact: Delivered 6+ marketplace integrations and 240+ components in a responsive, modular architecture, centralizing multi-channel inventory, sales, and financial operations with real-time updates.

PlanEx — *Enterprise Workforce & Operations Management SaaS · Digimark*

Frontend Solution: Built the frontend for a multi-module enterprise platform unifying fragmented departmental tools — employee management (onboarding/offboarding, activity logs), project & delivery tracking, HR/attendance and leave, and payroll/expense/billing with financial dashboards.

Architecture & Integrations: Next.js 16 (App Router) + React 19 + TypeScript; server state with React Query, client state with Zustand, complex forms with React Hook Form; integrated CKEditor (DOMPurify-sanitized) for rich content, Recharts for visualization, and XLSX export for reporting.

Stack: Next.js, React, TypeScript, Tailwind CSS, Radix UI/shadcn, Zustand, React Query, Axios

Impact: Delivered 30+ reusable, type-safe components enabling end-to-end employee lifecycle management, real-time attendance/expense/payroll views, and Excel-based reporting in a responsive, accessible UI.

Scintia Callflow — *Sales Panel — AI Voice-Agent SaaS Platform · Digimark*

Frontend Solution: Built the sales-facing portal of a multi-panel AI voice-agent SaaS, delivering dashboards, subscription plan/billing management, call-log workflows, and analytics tailored to sales teams.

Architecture & Integrations: React + TypeScript SPA with Redux Toolkit + RTK Query and React Router, integrating REST and AI voice-agent APIs for authentication, billing, and call analytics.

Stack: React.js, TypeScript, Redux Toolkit, RTK Query, Tailwind CSS

Docsify — *AI-Powered Multi-Format Document Translation App · Zweidevs*

Frontend Solution: Designed and developed an AI-powered web app for multi-format file translation (PDF, DOCX, TXT) into multiple languages, with file-upload workflows and dynamic rendering of results in a clean, guided UI.

Architecture & Integrations: Responsive Next.js/React + TypeScript frontend integrating third-party AI translation APIs, with format-aware upload and result-rendering pipelines.

Stack: Next.js, React, TypeScript, Tailwind CSS, AI Translation APIs

Mall Shark — *E-Commerce / Marketplace Platform · Disruptive Effects*

Frontend Solution: Built responsive, reusable interfaces for an e-commerce marketplace connecting buyers and sellers — delivering a smooth, hassle-free shopping experience across the platform for both buyer and seller flows.

Stack: Next.js, React, TypeScript, Tailwind CSS

EDUCATION & CERTIFICATIONS

B.S. in Software Engineering — Government College University Faisalabad (GCUF) 2016 – 2020

Next.js Developer Course — Udemy 2021
